PROFESSIONAL SUMMARY

Senior Data Scientist with ~3.5 years of experience across geospatial analytics, optimization, and predictive modeling in mapping, logistics, and retail. Delivered $20M+ in business value through Mixed-Integer Programming (Gurobi), churn modeling, and spatial analytics, including a 15% YoY efficiency gain and £7M+ in incremental sales. Skilled at translating ambiguous business problems into production-ready, data-driven solutions.

EXPERIENCE

HERE Technologies, *Senior Data Scientist* May 2026 – Present | Mumbai

A Senior Data Scientist driving **geospatial** data science and quality optimization initiatives for large-scale mapping products. Expertise in designing **spatial analytics** frameworks, automated validation systems, and scalable data pipelines that improve data integrity, operational efficiency, and product quality. Recognized for translating complex geospatial challenges into robust analytical solutions that support strategic decision-making and accelerate data-driven product development.

- Built a geospatial validation workflow comparing VPD sign detections against Ground Truth datasets, improving sign-level quality accuracy by **15%** for map production use cases.
- Developed clustering and matching pipelines (Python, SQL, PostGIS, DBSCAN) to group sign observations, reducing false-positive noise by **10%** across map.
- Designed automated data-quality validation systems and scalable ETL pipelines, cutting manual QA effort and improving data integrity across mapping products.

A.P. Moller - Maersk, *Associate AI-ML Scientist* May 2025 – May 2026 | Pune

A senior member of the Engineering team within Vessel Chartering and Voyage Operations, leading data science and optimization initiatives across network planning, vessel deployment, and forecasting. Partnered with global stakeholders to translate complex business challenges into scalable analytical solutions that improved operational efficiency and profitability.

- Developed a Gurobi-based Mixed-Integer Programming engine (NED Optimizer) to determine optimal vessel allocations and service swaps, generating **$20M in business value** and improving network execution efficiency by **15% YoY**.
- Designed and deployed a predictive analytics model for forecasting ship chartering rates across market segments, enhancing pricing visibility and supporting data-driven commercial negotiation strategies.

TESCO , *Associate Data Analyst* Feb 2023 – Apr 2025 | Bengaluru

A key contributor within the analytics team, using machine learning and experimentation to drive customer retention, market intelligence, and store performance.

- Built a PySpark-based churn prediction model (**92% accuracy**), partnering with CRM teams on data-driven retention campaigns that generated **£3M in incremental sales**.
- Ran A/B tests across **100+ stores**, increasing sales by **15%** and reducing operational inefficiencies by **18%** through optimized pricing and inventory.
- Built a SHAP-based market intelligence model analyzing inflation, pricing, promotions, and store expansion — improving prediction accuracy by **15%**, surfacing a **12% YoY** revenue growth trend, and strengthening competitive positioning by **10%**.
- Designed a spatial store-catchment analytics tool to evaluate customer-store affinity and competitive presence, informing store strategy that delivered **£4M in incremental sales**.

SKILLS

- **Languages & Data:** Python, SQL, PySpark, PostGIS
- **Machine Learning & Deep Learning:** ML/DL, NLP, Computer Vision, Time Series Forecasting, GenAI & LLMs
- **Optimization & Analytics:** Operational Research, Mixed-Integer Programming (Gurobi), A/B Testing, Statistical Modeling, Spatial Analytics
- **MLOps & Cloud:** Docker, Kubernetes, Azure ML, AWS SageMaker
- **Visualization:** Tableau, Power BI

EDUCATION

Masters in Mathematics, *S.K. Somaiya Vidyavihar University (9.8 GPA)* 2022 | Mumbai

Post-Graduation in Data Analytics and Machine Learning, *Imarticus Learning* 2022 | Thane

Bachelor in Mathematics, *University Of Mumbai (8.9 GPA)* 2020 | Mumbai

ACHIEVEMENTS

- **Gold Medalist, MSc Mathematics** – Academic excellence and top-ranked performance.
- **NCC Award Recipient** – Recognized for outstanding leadership, discipline, and dedication.
- **Multiple Tesco Value Awards** – Awarded for delivering impactful business solutions and fostering cross-team collaboration.
